## Le livre à lire:

### Benchmarks sur un coin de table

wrk -t12 -c400 -d30s http://localhost:8000/agents

- 1. WebServices REST/JSON
- 2. Performance
- 3. Simple

### **Futur**

Documentation

 Vrai benchmarks (cf. Conférence Ronan Amicel): https://speakerdeck.com/ronnix/performance-desframeworks-web-python-vs-the-world-v1-dot-1

• Meilleur multiprocessing (surement via Gunicorn)

http://www.api-hour.io/

### Remerciements

- ALLOcloud/Eyepea
  - Particulièrement:
    - Nicolas Stein (Nike)
    - Sylvain Francis (iCart)
- Aiorest, aiohttp, AsyncIO et Gunicorn devs
- Communauté Python
